

The Morphic *M48 Series* Timepiece

(MPH4801 – MPH4807)

Setting Instructions

- 1) Pull the crown out two clicks to its most outward position.
- 2) Rotate the crown clockwise until the day of the week sub dial hand is pointing at the hash mark *before* the current day of the week (the primary time hands will point at 2AM).
- 3) Set the current time as follows:
 - for AM hours advance the hands directly to the current time,
 - for PM hours advance the hour hand one full rotation (12 hours) *once*, prior to setting the time.
- 4) Push the crown in one click to its middle position.
- 5) Set the current date by rotating the crown counterclockwise.
- 6) Push the crown in one click to its rest position to commence timekeeping.

Note: Setting the time to AM / PM accordingly ensures that the date indicators change at midnight rather than noon. If the date indicators are changing in the afternoon advance the hour hand one full rotation (12 hours), then reset the date indicators as necessary.

Water Resistance Guidelines

50M – Suitable for short duration bathing and swimming only. Not suitable for diving. **Note:** manipulation of the crown while the watch is in contact with water will negate the rated water resistance as water penetration may occur.
