

The Morphic M56 Timepiece

(MPH5601 – MPH5607)

Setting Instructions

- 1) Pull the crown out two clicks.
- 2) Rotate the crown clockwise until the date indicator advances one position.
- 3) Set the current time by rotating the crown clockwise;
 - for AM hours **do not** advance the hour hand past the 12 o'clock position,
 - for PM hours advance the hour hand past the 12 o'clock position **once**.
- 4) Push the crown in one click.
- 5) Set the current date by rotating the crown counterclockwise.
- 6) Push the crown in one click to commence timekeeping.

Note: Setting the time to AM / PM accordingly will ensure that the date indicator changes at midnight rather than noon. If the date indicator has not changed to the current date by 6 AM, the time is currently displaying PM hours. To correct this, advance the hour hand 12 hours (one full rotation), then reset the date indicator to the current date.

Water Resistance Guidelines

5 ATM (50M) - may be submerged for short durations in normal temperature fresh water only. Not suitable for bathing, swimming, watersports, or diving.

Note: Manipulation of the crown while the watch is in contact with water will negate the rated water resistance, as water penetration may occur.
