

The Morphic M62 Timepiece

(MPH6201 – MPH6206)

Setting Instructions

- 1) Pull the crown out two clicks.
- 2) Rotate the crown clockwise until the day indicator displays the correct value.
- 3) Set the current time by rotating the crown clockwise;
 - for AM hours, **do not** advance the hour hand past the 12 o'clock position,
 - for PM hours, advance the hour hand past the 12 o'clock position **once**.
- 4) Push the crown in one click.
- 5) Set the current date by rotating the crown counterclockwise.
- 6) Push the crown in one click to commence timekeeping.

Note: Setting the time to AM / PM accordingly will ensure that the calendar sub dials change at midnight rather than noon. If the calendar sub dials do not display the current date / day by 6 AM, the time is currently displaying PM hours. To correct this, advance the hour hand 12 hours (one full rotation), then set the date / time again.

Water Resistance Guidelines

5 ATM - may be submerged for short durations in normal temperature fresh water only. Not suitable for bathing, swimming, watersports, or diving.

Note: Manipulation of the crown while the watch is in contact with water will negate the rated water resistance, as water penetration may occur.
